

### Addition Up to 20 with Regrouping

**Make a Ten** is the combining numbers that equal to 10. Understanding how numbers relate to 10 (e.g. 6 is 4 away from 10) is critical for fluent computation.

Make a ten is an important strategy because it is easy to add a number to 10.

#### Example 1

Write an equation for the following picture.

#### Explanation

**Method 1:** Count it out.

Therefore:  $9 + 5 = 14$

**Method 2:** Take a 1 from 5 and add to 9 to form a 10. And then add 4 which results in 14.

#### Example 2

$$7 + 8 =$$

#### Explanation

**Method 1:** First Take a 2 from 7 and add to 8 to form a 10.

And then add 10 with 5.

$$7 + 8 = 15$$

5 2 + 10

**Method 2:** First take a 3 from 8 and add to 7 to form a 10.

And then add 10 with 5.

$$7 + 8 = 15$$

10 3 + 5
